Carmen,

Attached are the following related to the former Westinghouse apparatus repair plant in Rancho Dominguez, California:

- Derivation of the site-specific risk-based cleanup level for PCBs in porous surfaces;
- Draft annotated outline for the Risk-Based PCB Cleanup Plan; and
- Responses to EPA comments dated May 18, 2016 regarding post-cleaning sampling.

We look forward to your review and approval of these submittals. Note that we are also awaiting EPA review and approval of the EPC calculations submitted to EPA on October 30, 2015.

If you have questions at this time, please do not hesitate to contact me.
